EDUCATION

Lewis University

Bachelor of Sciences: Computer Science

Concentration: Video Game Development

Graduation: May 2026

GPA: 3.4

TECHNICAL SKILLS

Software: Godot, Blender, Unity, GitHub, Visual Studio, VS Code, Azure

Relevant Coursework: Video Game Dev, Object Oriented Programming, Scientific Computing

Programming Languages: C#, JavaScript, GDScript, Python

Languages: English

EXPERIENCE

ECaMS Billboard | *Capstone Project* | Lewis University

February 2024 - December 2025

- **Designed and developed an interactive digital kiosk system** that displayed dynamic event, club, and faculty information.
- **Implemented user interaction through QR-based mobile integration**, enabling real-time flyer submissions and data-driven content updates
- Engineered **automated workflows** for content lifecycle (submission, approval, expiration, and prioritization)

Target | *Closing Expert* | Broadview, IL

June 2024 - Present

- Assisted Customers with their shopping needs by ensuring ease of navigation, resulting in **efficient customer service**.
- Worked effectively in a team, utilizing **strong communication skills** to coordinate tasks and support members.
- Proactively identified and resolved issues that arose. Employed **critical thinking** and **problem solving skills**.

PERSONAL PROJECTS

Transmission Received | *Godot / GDScript* | [Github](#) | [Youtube](#)

- 3D horror puzzle game featuring **modular puzzle systems**, **interactive object inspection**, **dynamic audio**, and **event driven progression**.
- Along with randomized puzzle generation, **cinematic scripted events** and **environmental transitions** were implemented while maintaining scene architecture.

ToeJam & Earl | *Monogame / C#* | [Github](#) | [Youtube](#)

- **Recreated classic roguelike gameplay systems** (predefined level generation, randomized item spawns, and enemy behavior) to mirror the original game's mechanics.
- **Designed and optimized core game loop** (spawning, progression, and player feedback systems) while maintaining balance between challenge and exploration.
